

LETTERS TO THE EDITOR

NAET®: Great for Allergies

My Experience with NAET®

Dear Dr. Devi,
I recently began NAET® treatment with Ian Rawlinson in Petaluma. My long time friend and practicing acupuncturist (NAET®) Melissa Green in Austin Texas had encouraged me to begin treatment for years and when I took her up on her offer, she was able to recommend me to Ian, who was a little closer to home in Petaluma. I cannot begin to properly express the momentous impact NAET has had on my life, and the gratitude I feel towards you. To give you some background, I began experiencing allergies at the age of 13 (I am now 30) with severe asthma, hospitalized several times. My allergies only became worse with time. Through the years, doctors had me on prednisone steroid several times as well as a constantly rotating “cocktail” of medications in an attempt to control my allergies, they convinced me to begin bi-weekly “allergy shots” to attempt to build an immunization to my allergies. My symptoms could at times be masked, but never cured. There was no “season” for me, allergies were all the time, everywhere, everyday. During the last year, in addition to my environmental allergies I discovered I was also experiencing food allergies, with severe stomach aches after almost

every meal.

When I began treatment with Ian at the beginning of the year I was on 4 daily medications and still having terrible attacks. I came into the NAET treatment hopeful and with an open mind, but realizing many times I had tried remedies which failed. For the short eight months I have been having the NAET® treatments, my life has changed dramatically. I have had less allergy attacks than I can count on one hand, and these used to be a daily and weekly occurrence. I hear friends and colleagues complaining of “the worst allergy season ever” and I cannot relate for the first time since I was a teenager. I feel healthier, stronger and more balanced. Through treatment I have begun to understand the core of my symptoms and ailments and how to naturally and through Chinese medicine become stronger, thus eliminating my allergies.

I cannot thank you enough for this treatment, I am a believer, it has changed my life and I cannot get the word out fast enough about this approach to healing and balancing our bodies.

Sincerely,

Angela

MY RECOVERY FROM CANCER..... BUT FIRST HOW I CAME TO NAET

After 3 long years I finally had my baby boy in my arms. At 3 months he developed severe asthma. At the age of 3 he developed a heart murmur, side effect of the medication. My closest friend's family, had a background in Holistic medicine... information passed on from family to family. Her suggestion: raw, unfiltered turtle oil. She brought me some and out of appreciation I subjected my baby to this smelly, foul tasting oil. He had one subsequent childhood asthma attack. I would have to hide the horrible stuff from him, if he started to feel bad before I noticed he was after the oil.

Unfortunately, my 3 boys had asthma... but I had the way out of traditional meds. One thing lead to another the holistic approach became the first step to healing in our family, for the boys.

As for myself, I looked for the quick fix, surgery... surgery for carpal tunnel, knees, gall bladder, appendix and for a cancerous cervix. (endometrial cancer). But this time surgery didn't work, pathology showed cancer had penetrated the cervical wall. The doc's wanted to re-do surgery, get samples, start chemo and radiation. The more I listened, the more I just shriveled up inside... these docs are really going to kill me. My mind was made up before I left the medical building... We are doing this the holistic way. When the City of Hope doctor heard about this he strongly encouraged me not to wait too long, this cancer has been known to progress quickly & he would be hard pressed to offer much hope if I waited more than 2 months.

With the blessings of my oncologist and a promise to allow him to follow my medical progress I began my journey into the world of NAET®. My initial consultation with Dr. Devi was the first glimmer of hope I had had in 2 months. The

moment I saw her, I knew I was in right place. Her emphatic assurances that she only treated allergies were repeated over and over, but I knew I was in the right place. I just figured I had an allergy to cancer, and she just might be able to treat my self decreed allergy! I was right. Allergy treatment after treatment I improved and improved and improved then, I got well.

By the 2nd three-month check up with the oncologist, he extended his hand to congratulate me on my excellent health. It's been 10 months now, I've had a PET scan and quarterly blood tests and all cancer/tumor markers are well below average for a healthy person. I seem to be as healthy as a healthy person can be.

To be honest I just wanted good quality time with my grand-son & granddaughter... If I had to die back then I wanted to spend every waking moment lucid and watching them, not hairless and vomiting. I love my husband, after almost 40 years, I wanted to show him all the wonderful things he has in his life so he wouldn't be lonely.

So here I am, back in school, watching my babies grow and keeping my husband company. The best thing is, just as I knew I was in the right place with Dr. Devi being the perfect doctor for me, I know that I will never have this cancer again.

Hugs & More Hugs ... Nani

A female nurse age 35 had had asthma since age 4. She had had several attacks of anaphylaxis while growing up, and had to be rushed to the emergency care each time. She continued to have anaphylactic reactions during her work as a nurse, most of which were due to allergy to latex. Anaphylaxis had been manifested in attacks of asthma and swelling in her tongue and lips which is called angioneurotic edema. She had been rescued with her EpiPen. She also took medications regularly to keep her symptoms under control. Medications included Advair and

Zertec. She had had injections of prednisone type medication many times to treat her asthma.

Then we decided to try NAET® treatments on her. She tested allergic to grains, dairy products, eggs, B complex vitamins, latex, tomatoes, and mold. When she successfully completed NAET® treatments for these NAET basic allergens, her asthma disappeared and she had no more attacks of anaphylaxis.

She began to experience some asthma a year and a half later. It was worse in the summer. She tested allergic to pollens and latex in combination. It was the first time a recurrence of latex allergy had occurred in this office. It was explained that it is not known how to prevent development of allergies in person who has a tendency to develop allergies. Fortunately NAET® is available to remove allergies. The nurse's allergy to pollens, pollens and latex in combination were removed and she was relieved of symptoms once again.

“I LOVE MY LIFE!”

EVERY MORNING I WAKE UP GRATEFUL FOR ANOTHER DAY TO EMBRACE AND ENJOY. I am true to my purpose and that purpose is: “To use my enthusiasm and nurturing skills to inspire and heal others so that they can achieve perfect health, happiness, and be loving and kind to themselves and others”.

This was not how it used to be. I grew up in a home with abuses of every kind. I married at 24 and carried those abuses into my marriage. I spent every waking moment trying so desperately to forget. What exactly, I wasn't quiet sure. I lived my life under the belief that if I spent every waking moment doing things for others, I would somehow find some peace.

This resulted in my body finally giving out at age 41. I was in the fetal position, going down the black hole and not an ounce of energy left to even try and stop it. I had only one thought, “if I die everyone in my life will be better off.”

It was in this state that I was taken to a NAET® practitioner. I was carried in. After the first treatment of BBF, I was able to walk out. In 6 months I felt the best I had ever felt in my life. After 2 years I was able to embark on a journey of helping others.

Today I am one of the owners of the Richmond NAET® Clinic. My mind is calm, I am at peace with myself and I finally feel like I am in control of my life.

Lou-anne Etter, NAET Practitioner
Richmond NAET® Clinic

Dear NAET Friends,

My daughter of 17 years old suffered from many allergies (peanut, milk, strawberries, eggs, dogs, cats, honey, and grass) and had interstitial cystitis for over 3 years. After trying many treatments and medication (\$3000.00 just last year out of pocket expenses alone), she also had an operation for an extension of her bladder and the doctor said there was nothing else he could do. She would have to live with the pain. She had to quit her job and had difficulty to go to school. Some days the pain was so bad she had trouble to get out of bed. But thank God we heard about NAET® and after 10 treatments the pain is gone and she doesn't have anymore allergies. It's unbelievable. She can eat peanuts and every other products she was allergic without swelling and no more trouble breathing.

Thank You Cheryl! You have changed my daughter's life for the best and we are very grateful.

Dear Dr. Nambudripad,

I am not sure if you remember me, but we met when you were in Australia. I took your courses and we did a radio show together. I have been meaning to email you for some time now to let you know how much I value NAET® and tell my patients what a true genius you are. Thank you so much for having the insight and wisdom to figure out a method that helps so

many people have such an improved quality of life. By the way, just to share a bit of information since we are in Australia and the pollens are different. The vials were good, but some patients were still struggling. I have the patients leave a saturated paper towel stuck to a plate overnight in their front and backyards and then test/treat them for this and it seems to make a world of difference for them. Once again, thanks for everything and have a great day. Hope to see you soon in Australia.

All the best,
Robin Nameth
