

LETTERS TO THE EDITOR

NAET®: Great for All Allergies

Dear Editor,

Words cannot properly express my thanks and gratitude for what you have done for me that no one else could. A friend told me about NAET. All the other allergy treatments I tried failed, so I was naturally skeptic.

When I went to Shannon Lydick, L.Ac., I had been suffering from severe allergies all my life. I thought I was allergic to virtually everything that grew in the ground. I was taking seven different prescription allergy drugs plus several over-the-counter allergy drugs and six allergy shots per week trying to get relief. Nothing worked.

I had a tough time accepting that foods were the root cause of all my problems but I was desperate for relief. My NAET practitioner, Shannon Lydick explained in easy-to-understand language what Dr. Devi had discovered about food allergies. He tested me for the 79 major food allergies and I was shocked at what I was allergic to.

I began NAET treatments and saw immediate results. I continued treatments to the foods I was allergic to. With each allergy elimination, I was amazed at the results. One of the most incredible things I learned was about my allergies to grass., flowers, weeds, etc. He told me that everything that grows on the ground contains vitamin C and I was allergic to vitamin C. After completing vitamin C treatment, I was anxious to see what happened when I worked in my yard. All my life, when I was outdoors, I would have to take

massive amount of antihistamines to lessen the allergy attacks and then sleep for 4 hours from the medicine. Wow, what an incredible feeling for the first time in my life to not experience a severe allergy attack!

He not only cured me of all my allergies to foods, environments & emotional imbalances but also stopped a chronic back pain I have lived with daily since I was 16. I do not need any prescription medications, over-the-counter drugs and allergy shots now. I feel just great on my own.

He has also showed me the correct amount of vitamins that my body needs. The correct method of taking vitamin supplements is also given in the NAET guidebook by Dr. Devi. But I did not understand the method until he showed me. After clearing all the toxins out of my system, I have lost 26 pounds in six months. Did I tell you how great I feel now?

As you know I tell everyone about NAET. I refer everyone to Shannon Lydick, my NAET practitioner. A skeptic friend of mine didn't believe me when I told him NAET cured all my allergies. So he tried NAET himself. He is now a huge advocate like me. I will forever be extremely grateful to my practitioner for what he has done for me and to Dr. Devi for developing it and sharing it with other fellow practitioners so that we all could benefit from her discovery. If you ever have someone hesitant about NAET, please have them contact me so I can educate him or her about this amazing treatment

process I experienced. Thanks again for this wonderful discovery. I will forever be grateful to Shannon Lydick and Dr. Devi for the incredible benefits I received from my NAET treatments.

Best wishes
Annie Leis

Dear Editor,

Samantha, age 33, was referred to me by one of my patients. When she came to me, she complained of moderate to severe pain in the abdomen centered at one specific point between the naval and the symphysis pubis. This pain had persisted constantly for 18 years since Samantha was 15 years of age.

While taking case history, it was revealed that Samantha had been an all A student as a ninth grader and then started making D's, and F's. When this happened, Samantha used ink eradicator and changed them to A's and B's. When the semester came to an end, Samantha knew that her parents would find out what she had done and she attempted suicide. Her attempt failed but she was left with the emotional guilt.

Samantha finished school, got married and has two beautiful daughters. She has undergone 8 major surgeries since trying to find relief from her ongoing abdominal pain, the last of which was a complete hysterectomy but none stopped the pain. Her pain was so severe that she could seldom play with her children or take them out shopping as she was bedridden much of the time.

I tested Samantha through NAET emotional testing technique and found her emotional guilt could be the cause of her pain. I explained this to her. She said that she has resolved the guilt through knowing that all teenagers make stupid mistakes and she no longer felt guilty. I told her that her conscious guilt was gone but that her subconscious mind is still holding on to that guilt.

I treated Samantha with NAET Emotional method on the first visit and Samantha's pain left immediately. One week later, Samantha called me to tell me that the pain was still gone but she had a tickle left in one spot. Samantha returned for a second treatment and was treated again for a combination treatment with the same guilt coupled with fear. The following week, she called to say that she had not experienced any more

pain or discomfort in her abdomen after the second treatment. That was two years ago and Samantha still remains pain-free.

I see Samantha now and then when she brings a car load of new patients to me from her home town 100 miles away. She volunteers to drive them to my office first time. She is a great advocate of NAET now. This young woman has been given a new life through wonderful NAET treatment.

Sincerely,
John H. Kasler, D.C.

Dear Dr. Devi,

I don't expect with the large numbers of practitioners you train, and the large numbers of patients you treat, you will remember me, but I trained with you in 1995. I also came down to Los Angeles twice for treatments with you, as I have been pretty ill for quite a few years.

Your diagnosis was that I had parasites. I have been tested many times for parasitic infections, but tests never turned up positive. I continued to see different doctors specializes in parasitology. I wanted to prove that I had parasites in my body through laboratory tests before I submitted to get treated to eliminate them. Anyway I thought you might be interested to know that last November I was tested for parasites by Dr. Ibraheem, who practices medicine in New York. and specializing in parasitology. His test was positive for parasites. In fact according to his findings I had five types of parasites. Since I have been treated for them my health has improved dramatically.

I read with great interest the developments of NAET and continue to get great results using it in my practice.

Sincerely,
Ian Rawlinson, L.Ac.
